love the moment, and your energy is boundless.

Artist's Biography...

Jessica Timberlake loves to take pictures of flowers, the brighter and lighter, the better. Her images are captured in camera, with no post production. She developed an interest in photography after losing her only brother when he was only 27 years old. With each press of the shutter button, Jessica's heart heals a little bit more – and she loves that she can show the beauty that she sees in the world to others. Her interest has expanded into working with watercolors and fingerpainting in oils. Jessica's art is featured in award-winning spas, private collections and galleries from New York, to Hungary, to Montenegro. When she's not working on her art, Jessica loves to journal, run and sip a glass of wine - in that order.

Education...

2020 Ongoing self-guided education

Skillshare

2017 Studied Under:

Rick Hulbert

2016 Studied Under:

Rick Hulbert

2015 Studied Under:

Diane Chan
